

Score	Scale 1: Understanding the Problem	Scale 2: Solving the Problem	Scale 3: Answering the Problem
4	Complete understanding of the problem	A plan that could lead to a correct solution with no arithmetic errors	Correct solution
3	Misinterprets minor part of the problem	Substantially correct procedure with minor omission or procedural error	
2	Misinterprets major part of the problem	Partially correct procedure but with major fault	Partial answer; answer with computational errors but correct process
1	Completely misinterprets the problem	Totally inappropriate plan	Copying error; no answer statement; answer labeled incorrectly
0	No attempt	No attempt	No answer or wrong answer based upon an inappropriate plan

Score	Scale 1: Understanding the Problem	Scale 2: Planning a Solution	Scale 3: Answering the Problem
2	Complete understanding of the problem	Plan could have led to a correct solution if implemented properly	Correct answer and correct label for the answer
1	Part of the problem misunderstood or misinterpreted	Partially correct plan based on part of the problem being interpreted correctly	Copying error; computational error, partial answer for problem with multiple answers
0	Complete misunderstanding of the problem	No attempt, or totally inappropriate plan	No answer or wrong answer based upon an inappropriate plan
